

What kinda water should I shoot???

Dope

Water

1. sterile water (available at Needle Exchange)
In order of purity

2. distilled (you can get it at most Supermarkets)

3. bottled H₂O (like Evian and shit—keep it in the fridge and dont drink out of it. so, dont use for injection

once its been open for more than 24hrs)

4. boiled tap water (boil for at least 5 min. in clean saucepan—stainless steel or glass pots are best).

Getting well #5
